Auto-saving of images

Saved From: https://www.pingman.com/kb/article/auto-saving-of-images-13.html

Question

Can I auto-save graph images from PingPlotter for use on a web page, for FTP transfer, etc.?

Solution

Note: The following information currently applies to versions 4.12.0 and older of PingPlotter.

Yes, PingPlotter supports saving of images in BMP, PNG or GIF format. In the auto-save image section, you can set the save interval to tell Ping Plotter how often to save the images, what filename to save the data to and what type of image format to save the graph in.
