Reverse traceroute sites.

Saved From: https://www.pingman.com/kb/article/reverse-traceroute-sites-3.html

Question

Do you know of any sites that will do a traceroute back to me, as opposed to me initiating the traceroute from my location?

Solution

One of the best sites is at traceroute.org. Google is also your friend here - try using the search terms: traceroute gateways

Many sites here allow you to trace from a remote destination back to your own computer (or another server) to help determine the return route.
