Some columns not visible on trace graph.

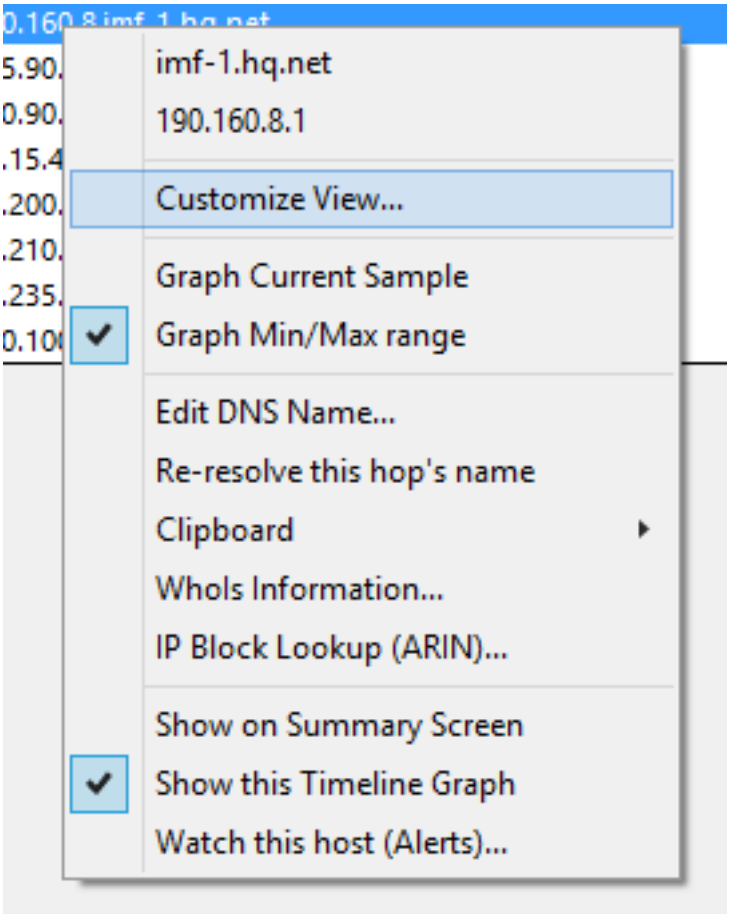

Saved From: https://www.pingman.com/kb/article/some-columns-not-visible-on-trace-graph-55.html

Question

How do I set up the trace graph so I can see the average, maximum, minimum, packet loss percentage, etc? I had them visible once and now I seem to have lost them.

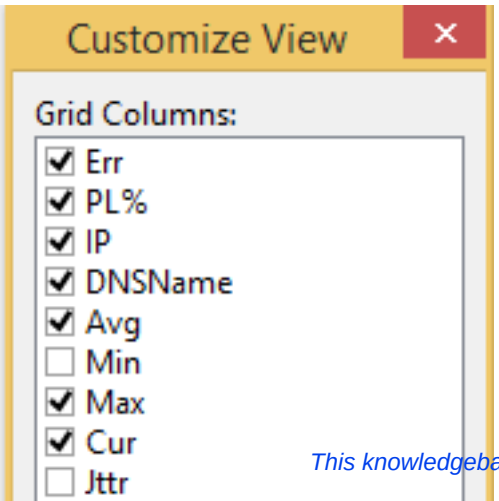

Solution

Do a mouse 'right-click' anywhere on the upper graph area, and select the "Customize View" option.

You will then see the menu that gives you the options to turn those columns on and off.

One thing to keep in mind is that if you plan on sending a graph to your ISP, etc.. you may want to turn off the current, maximum and minimum and only show the packet loss percentage and average. See the Beating Up on Your ISP section of the tutorial for more details.
