MultiPing - How many licenses?

Saved From: https://www.pingman.com/kb/article/multiping-how-many-licenses-90.html

Question

I'd like to install MultiPing on two different computers, 1 monitoring 50 targets, the other 250. How many licenses do I need?

Solution

MultiPing is licensed per install, and a single install can monitor any number of targets (we test monitoring up to 1000 targets in a single instance).

If you're going to install on 2 computers, you'll need 2 licenses, no matter how many targets each is monitoring.
