PingPlotter and MultiPing Legacy Releases

Question

I'd like to download an older version of PingPlotter/MultiPing. How can I do this?

Solution

If you're not able to run the latest version of PingPlotter/MultiPing (whether it be that your maintenance has expired, or if you're just feeling nostalgic) you can always access older versions of our programs via your account page.

If you're in a hurry for an older version, and happen to have your license key handy - you can enter it on this page to get a list of versions that key is entitled to run.

If you don't have access to the original email that was used to purchase your license, and can't access your account - feel free to contact us and we'll be happy to help out.
